FIRST ANNUAL REPORT OF ACCOMPLISHMENTS

UNDER THE AIRPORT IMPROVEMENT PROGRAM

AUTHORIZED BY THE AIRPORT AND AIRWAY IMPROVEMENT ACT OF 1982

(PUBLIC LAW 97-248, ENACTED SEPTEMBER 3, 1982)

FISCAL YEAR ENDING SEPTEMBER 30, 1982

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

THE SECRETARY OF TRANSPORTATION
WASHINGTON, D.C. 20590

MAY 18 1983

The Honorable George Bush
President of the Senate
Washington, D. C. 20510

Dear Mr. President:

I am pleased to transmit to you the First Annual Report of
Accomplishments under the Airport Improvement Program as
required by Section 521 of the Airport and Airway Improvement
Act of 1982.

Sincerely,

Elizabeth Hanford Dole

Enclosure

THE SECRETARY OF TRANSPORTATION

FIRST ANNUAL REPORT OF ACCOMPLISHMENTS UNDER THE

AIRPORT IMPROVEMENT PROGRAM

Section 521 of the Airport and Airway Improvement Act of 1982 (Public Law 97-248) requires that the Secretary of Transportation submit an annual report to Congress describing the accomplishments of the airport grant program. This report covers activities for the fiscal year ending September 30, 1982.

BACKGROUND

To promote the development of a system of airports to meet the Nation's needs, the Federal Government embarked on a grants-in-aid program shortly after the end of World War II. This early program, the Federal-aid Airport Program (FAAP), was brought into existence with the passage of the Federal Airport Act of 1946 and drew its funding from the general fund of the treasury.

In 1970, a more comprehensive program was established with the passage of the Airport and Airway Development Act of 1970. The Act provided for airport planning under the Planning Grant Program (PGP) and for airport development under the Airport Development Aid Program (ADAP). These programs were funded from a new Airport and Airway Trust Fund, into which were deposited revenues from several aviation user taxes on such items as airline fares, air freight, and aviation gasoline. The Act, after several amendments and a one-year extension, expired on September 30, 1981.

The current grant program, known as the Airport Improvement Program (AIP), was created by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, September 3, 1982); it continues to provide funding for airport planning and development, but under a single program. Funding through the Airport and Airway Trust Fund is continued, along with many other features in the previous legislation. The 1982 Act also authorizes funds for noise compatibility planning and to carry out noise compatibility programs as set forth in the Aviation Safety and Noise Abatement Act of 1979 (P.L. 96-193).

The Act also requires the Secretary of Transportation to publish, by September 1984 and every two years thereafter, a report on the status of the new National Plan of Integrated Airport Systems (NPIAS), which succeeds the National Airport System Plan (NASP). The NPIAS will give greater emphasis to system planning and development to meet current and future airport needs in the large metropolitan areas; it will include development considered necessary to provide a safe, efficient, and integrated airport system, meeting the needs of civil aviation, national defense, and the Postal Service. An airport must be included in this plan in order to be eligible to receive a grant under the AIP. In 1982, the NASP included about 3,650 locations.

Finally, although occurring after the end of the period covered by this report, it is significant to note that the new Airport and Airway Improvement Act was substantively amended twice within the first three months of fiscal year 1983. The Continuing Appropriations Act (Public Law 97-276, October 2, 1982) added a section providing authority to issue discretionary grants in lieu of unused apportioned funds under certain circumstances. The Surface Transportation Assistance Act (Public Law 97-424, January 6, 1983) increased the annual authorizations for the AIP for fiscal years 1983-1985.

POLICY

In formulating the Airport and Airway Improvement Act, the Congress included a "Declaration of Policy" section which states that:

- The safe operation of the airport and airway system will continue to be the highest aviation priority;
- The continuation of airport and airway improvement programs and more effective management and utilization of the Nation's airports are required to meet the current and projected growth of aviation and the requirements of interstate commerce, the Postal Service and the national defense;
- The Act should be administered in a manner to provide adequate navigation aids and airport facilities, including reliever airports and reliever heliports, for points where scheduled commercial air service is provided;
- The Act should be administered in a manner consistent with a comprehensive airspace system plan to maximize the use of safety facilities, with highest priority for commercial service airports, including but not limited to, the goal of installing, operating, and maintaining, to the extent possible under available funds and given other safety needs, a precision approach system and a full approach light system for each primary runway, grooving, or friction treatment of all primary and secondary runways, a nonprecision instrument approach for all secondary runways, runway end identifier lights on all runways that do not have an approach light system, electronic or visual vertical guidance on all runways, runway edge lighting and marking, and radar approach coverage for all airport terminal areas; (Note: The Facilities and Equipment Appropriation provides funding for items meeting published establishment criteria that are not included in airport development grants.)
- The Act should be administered in a manner consistent with the Federal Aviation Act of 1958 with due regard for the goals expressed therein of fostering competition, preventing unfair competition in air transportation, maintaining essential air transportation and preventing unjust and discriminatory practices;
- Special emphasis should be given to reliever airports and their development;

- Aviation facilities should be constructed and operated with due regard to minimizing current and projected noise impacts on nearby communities;
- The Federal administrative requirements placed upon airport sponsors can be reduced and simplified through the use of a single project application to cover all airport improvement projects to be undertaken in a particular year; and
- It is in the national interest to develop in metropolitan areas an integrated system of airports designed to provide expeditious access and maximum safety.

THE AIRPORT IMPROVEMENT PROGRAM

The Airport and Airway Improvement Act of 1982 authorizes the Secretary of Transportation to make grants for airport planning and development under a new Airport Improvement Program (AIP). Among major changes in the AIP when compared to its predecessor program (the Airport Development Aid Program, or ADAP) are provisions allowing grants to privately owned reliever airports; the establishment of minimum funding levels for reliever airports, low activity commercial service airports, noise related projects, and system planning; and a redesignation of airport categories. Authorization levels, after a single year totaling the same as the final FY 1981 level under the earlier program, are increased significantly beginning in FY 1983.

Annual Authorization

Funding levels authorized under the Airport Improvement Program are:

\$ 450,000,000	for fiscal year 1982
\$ 800,000,000	for fiscal year 1983 *
\$ 993,500,000	for fiscal year 1984 *
\$ 987,000,000	for fiscal year 1985 *
\$1,017,000,000	for fiscal year 1986
\$1,017,200,000	for fiscal year 1987

- * The annual authorizations were increased by \$200 million for each of the fiscal years 1983 and 1984 and by \$75 million for FY 1985 in the Surface Transportation Assistance Act of 1982 (Public Law 97-424, January 6, 1983). The levels above reflect these increases.

Airport Categories

The airport funding categories consist of Commercial Service, Primary, Reliever and General Aviation Airports.

A commercial service airport is a public airport which enplanes 2,500 or more passengers annually and receives scheduled passenger service.

A primary airport is a commercial service airport which enplanes .01 percent or more of the total number of passengers enplaned annually at all airports. For the fiscal year 1982 program, .01 percent was equal to 30,998 passengers.

A reliever airport is one that has the function of relieving congestion at a commercial service airport and providing more general aviation access to the overall community.

General aviation airports, although not specifically defined in the 1982 Act, comprise the largest single group of airports in the U.S. airport system; these are the airports that remain after exclusion of the commercial service and primary airport categories.

The definition of airports as any area of land or sea used for landing and takeoff of aircraft allows inclusion, within the above four categories of airports, of special types of facilities such as seaplane bases or heliports.

Distribution of Funds

Not more than 50 percent of the annual authorization may be provided to primary airports. These funds are apportioned for use by each airport sponsor based on the following formula:

- \$6.00 for each of the first 50,000 enplaned passengers
- \$4.00 for each of the next 50,000 enplaned passengers
- \$2.00 for each of the next 400,000 enplaned passengers
- \$0.50 for each passenger in excess of 500,000 enplaned passengers

Additionally, the apportionment for each primary airport is to be increased as follows for fiscal years 1984-1987:

1984	-	10%
1985	-	20%
1986	-	25%
1987	-	30%

Except for cases where appropriations actions may require adjustments, no primary airport receives less than \$200,000 nor more than \$12,500,000 per year. This money remains available for the sponsor's use for the fiscal year in which it is authorized and the two fiscal years immediately following.

A total of 12 percent of the annual authorization is for use within the States and Insular Areas. The 50 states, the District of Columbia and Puerto Rico qualify for 11.88 percent of these funds for general aviation airport projects, while in the insular areas (Guam, American Samoa, the Government of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands), all airports other than primary airports qualify for 0.12 percent. Funds apportioned to the States and Insular Areas remain available for the fiscal year in which authorized and the two fiscal years immediately following.

The remaining funds are defined as discretionary, but a sizable portion of these must be used to achieve specified funding minimums. A minimum of 10 percent of all funds is for reliever airports, 5.5 percent is for non-primary commercial service airports, 8 percent is reserved for planning and implementing noise compatibility programs under the Aviation Safety and Noise Abatement Act of 1979, and 1 percent is for the preparation of integrated airport system plans.

Additionally, Alaskan airports receive at least as much money as they were apportioned in fiscal year 1981 under the previous legislation. This amounted to \$13.8 million additional for Alaskan airports in fiscal year 1982.

Rate of Participation

Federal participation at all except the busiest commercial service airports is 90 percent of the total project cost. Primary airports whose total annual enplanements are 0.25 percent or more of the total number of passengers enplaned annually at all commercial service airports receive Federal participation at a rate of 75 percent. There are no adjustments in states containing high percentages of public land. Grants for Integrated Airport System Planning are funded at a 90 percent level. Development and land acquisition conducted in accordance with the Aviation Safety and Noise Abatement Act is funded at an 80 percent level.

Environmental Considerations

The Federal Aviation Administration (FAA) considers and weighs environmental factors in evaluating proposed Federal actions relating to airports. FAA Airports Program procedures identify types of actions which require an environmental assessment and consultation process. This process provides the FAA, other agencies, and members of the public with an understanding of the potential environmental impacts of a proposed action. Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) requires an environmental impact statement when an action would produce a significant impact on the environment; otherwise, a finding of no significant impact is prepared. Other laws have particular requirements relative to specialized concerns such as air quality, water quality, public recreational lands, historic and archeological sites, endangered species, coastal zones, wetlands, and floodplains.

Initial review of proposed Federal airport actions identifies the extent of environmental study and coordination required. If an action is not in a category requiring environmental assessment and does not have the potential, either individually or through cumulative effects, of significantly affecting the environment, it is categorically excluded from environmental processing. As experience has been gained in the environmental field, FAA procedures have categorically excluded more and more projects from environmental processing. In fiscal year 1982, FAA's releases of airport property for other uses were added to the categorical exclusion list.

The Airport and Airway Improvement Act of 1982 incorporates two changes to previous environmental provisions which applied specifically to ADAP projects under the previous program. One change has eliminated coordination with the Environmental Protection Agency and the Department of the Interior for new airport, new runway, and major runway extension projects covered by findings of no significant impact. The other change has eliminated the requirement to offer a public hearing for proposed runway extensions which are not major extensions. Both changes reduce Federal procedural requirements which went beyond the requirements of NEPA and the Council on Environmental Quality's regulations.

Civil Rights Requirements

Provision of assistance under the Airport and Airway Improvement Act of 1982 requires an airport sponsor to satisfy certain civil rights requirements. FAA Regional Civil Rights Offices have primary responsibility for monitoring compliance with Title VI of the Civil Rights Act of 1964 and regulations of the Office of the Secretary of Transportation (OST) (49 CFR Part 21). During fiscal year 1982, they completed six on-site reviews and found all sponsors to be in compliance.

Under the Minority Business Enterprise (MBE) program, in fiscal year 1982, FAA Regional Civil Rights Offices approved 242 programs, including annual updates of those approved in previous years. One hundred and ten notices of noncompliance were issued for deficient programs or for failure to carry out the terms of an approved program. Compliance by voluntary means was achieved in all but one case, which is under negotiation, so that enforcement procedures were not initiated.

Five complaints were filed under the MBE regulation, and two were filed under Section 504 of the Rehabilitation Act of 1973. No Title VI or Section 30 complaints were received. (Note: Section 30 refers to the Civil Rights section of the Airport and Airway Development Act, which has been retained in its entirety as Section 520 of the Airport and Airway Improvement Act.) In no case did the OST issue a finding of discrimination to an airport sponsor.

Fiscal Year 1982 Planning and Development Activity

The airport grant obligation ceiling established in the fiscal year 1982 Department of Transportation and Related Agencies Appropriations Act was \$450 million. This is the same amount authorized by the Airport and Airway Improvement Act. Because there were only four weeks remaining in the fiscal year when the authorization was received (i.e., on September 3, 1982), some sponsors were not in a position to accept a grant in this brief time period. In these instances, the apportioned funds carry forward and can be used in a grant in one of the two succeeding fiscal years. This accounts for virtually all of the shortfall between the authorization and actual obligations as reported below. Additional funds recovered from adjustments to prior year projects were made available for increases to other prior year projects.

Of the funds made available, \$405.7 million was used for 651 new grants under the Airport Improvement Program. In addition, a \$5.1 million grant was made to Reno, Nevada, under a special provision continued from previous legislation and \$6.8 million was used to amend 193 grants issued in prior years.

The new grants included 249 for a total of \$255,209,966 for primary airports, 89 for \$32,458,012 for other commercial service airports, 64 for \$49,053,047 for reliever airports, 218 for \$65,317,826 for general aviation airports, and 31 for \$3,676,995 for integrated airport system planning.

Included in the above were nine grants totaling \$811,837 to develop noise compatibility studies and 14 projects for a total of \$40,392,640 for amelioration of noise impacted areas adjacent to airports.

Charts on the following pages show the FY 1982 Authorization and Obligations. Listings of FY 1982 AIP funding by state and location are shown in Tables I and II, respectively.

AIRPORT IMPROVEMENT PROGRAM - FISCAL YEAR 1982 AUTHORIZATION

(Dollars in Millions)

	<u>FY 1982 Authorization</u>
TOTAL PROGRAM (Millions)	\$450.0
<u>Primary Airports</u>	
Apportionment (% of Authorization)	50%
Apportionment Amount	\$225.0
<u>General Aviation Airports (State Area/Population Formula)</u>	
Apportionment (% of Authorization)	12%
Apportionment Amount	\$54.0
<u>Reliever Airports</u>	
Funding (Minimum % of Authorization)	10%
Annual Amount	\$45.0
<u>Non Primary Commercial Service and Former Air Carrier Airports</u>	
Funding (Minimum % of Authorization)	5.5%
Annual Amount	\$24.8
<u>Noise Compatibility Projects</u>	
Funding (Minimum % of Authorization)	8%
Annual Amount	\$36.0
<u>Integrated Airport System Planning</u>	
Funding (Minimum % of Authorization)	1%
Annual Amount	\$4.5
<u>Alaskan Airports Provision</u>	
Funding (% of Authorization)	3.1%
Annual Amount	\$13.8
<u>Discretionary Funds 1/</u>	
Funding (% of Authorization)	10.4%
Annual Amount	\$46.9

1/ Additional funds are available for discretionary use if Primary or General Aviation (state) apportionments are used to meet the minimums shown for Reliever Airports, Non-Primary Commercial Service Airports, or Noise Compatibility Projects.

AIRPORT IMPROVEMENT PROGRAM

AUTHORIZED BY THE AIRPORT AND AIRWAY IMPROVEMENT ACT OF 1982, AS AMENDED

GRANT FUNDING AUTHORIZATIONS, APPROPRIATIONS, AND OBLIGATIONS

(Dollars in millions)

FISCAL YEAR	AUTHORIZATIONS	APPROPRIATIONS ACT		NET OBLIGATIONS	NUMBER OF PROJECTS	AMENDMENTS TO PRIOR YEAR GRANTS	NUMBER OF AMENDMENTS			
		OBLIGATION LIMITATION								
1982	\$ 450.0	\$450.0		\$405.7	1/	651	1/	\$6.8	3/	193
1983	\$ 800.0	2/
